

Simulink RF + AI Delivery Roadmap

Bespoke RF signal chain modeling with classifier-driven decision outputs

Modeling Depth
Simulink-first execution for RF chains, feature pipelines, and classification logic

Execution Transparency
Clear milestones, collaborative refinement, and measurable validation outputs

Decision Quality Focus
Classifier performance and decision reliability validated with traceable evidence

- Client Assurance Highlights
- Bespoke RF chain built using Simulink communications blocks
 - Feature extraction path aligned to classifier requirements
 - Validation suite with classification performance evidence
 - Clean handover with model and documentation

- Company Credentials Available
- Udyam registration
 - Startup India certificate
 - Incorporation and compliance records

Estimated Overall Timeline: 1 to 3 months
