

KiCad PCB Delivery Roadmap

Carrier-board schematic-to-manufacturing workflow with clear review gates

Reliable PCB Execution
15+ years in embedded electronics, KiCad design, and production handoff

Execution Transparency
Schematic, placement, and routing checkpoints with weekly status updates

Manufacturing Focus
DFM-ready outputs aligned with fabrication and assembly handoff

- Client Assurance Highlights
- Mostly-complete schematic finalized for layout readiness
 - RPi4 carrier integration with latch + PN532 UART paths
 - Design review checkpoints before release package generation
 - Native KiCad source + fab package handover

- Company Credentials Available
- Udyam registration
 - Startup India certificate
 - Incorporation and compliance records

Estimated Overall Timeline: 1 to 3 months
